MOAAZ ACHRAF SOPHY

Junior BI Developer || Data Analyst

+20 111 694 5268 | moaazachraf503@gmail.com | LinkedIn | GitHub | portfolio

Open to on-site opportunities in Cairo and willing to relocate across Egypt.

PROFESSIONAL SUMMARY

Junior BI Developer and ITI Power BI Development graduate with hands-on experience building end-to-end Business Intelligence platforms and Power Platform automation workflows. Skilled in SQL Server, SSIS, SSAS, SSRS, Power BI, Python, and Power Automate for developing ETL pipelines, interactive dashboards, and automated reporting and notification systems. Experienced in data modeling, DAX, Power Query, Power BI REST API integration, and SharePoint-based workflow state tracking. Graduated in Computer and Artificial Intelligence from Banha University. Focused on turning complex datasets into actionable insights through reliable, well-orchestrated BI and automation architecture.

PROJECTS

Egypt EconLens – Economic Intelligence & Supply Chain Analytics Platform *Python | Flask | SQL Server | Power BI | Microsoft Fabric | Azure | Power Automate | SharePoint | REST APIs*

Live Demo: Link | Repository: Project-Link

- Built an end-to-end Business Intelligence platform bridging economic, trade, and supply-chain data into decision-ready intelligence.
- Developed a natural-language AI Copilot that converts user questions into validated SQL queries and generates dynamic charts and insights.
- Embedded interactive Power BI dashboards and paginated RDL reports into a custom mobile-first application using Microsoft Fabric and the Power BI REST API.
- Engineered HTTP-triggered Power Automate workflows to authenticate against Power BI APIs, retrieve and filter workspace reports, distinguish paginated (RDL) from PBIX reports, export reports to PDF, and generate shareable OneDrive for Business links.
- Built a scheduled report-version-tracking workflow that compares Power BI report metadata against a persistent SharePoint ReportVersionTracker list to detect new or updated reports and trigger targeted subscriber notifications.
- Implemented a SharePoint-backed subscriber management workflow (ReportSubscribers list) with conditional logic to create and update subscriber records, manage report preferences, and return HTTP responses to the application.
- Designed dynamic HTML email templates and Outlook notification workflows for automated report distribution, new/updated report alerts, and AI-generated chat summary delivery.

LaLiga Match Intelligence & Analytics Platform Python | SQL Server | Power BI | DAX | REST APIs

Repository: Project-Link

- Engineered an automated end-to-end sports analytics ETL pipeline in Python ingesting 380 match fixtures, 20 club standings, and 776 player records across 10 statistical categories via Striker REST API with JSON caching.
- Designed a relational star schema data warehouse in SQL Server with 2 dimension tables (Teams, Dim_Players) and 5 fact tables (Matches, Leaders, Ratings, Standings, Team Stats) to optimize complex analytical queries.
- Implemented a multi-source player headshot enrichment pipeline across ESPN and TheSportsDB APIs using Unicode normalization and club matching, verifying 223 player portraits (76%) with dynamic fallback to club initials.
- Architected an ultra-wide (2560×1150) 5-page Power BI dashboard driven by an advanced 665-line DAX measure rendering a responsive HTML/SVG Single-Page Application with interactive radar charts and disconnected slicer parameters.

Real Madrid Season Analysis 2025–2026 *Python | Power BI | Data Analysis*

Repository: Project-Link

- Conducted performance analysis of Real Madrid during the 2025–2026 La Liga season using match and player statistics.
- Performed EDA and built visualizations to evaluate team performance, key metrics, and player contributions.

Bank Customer Churn Prediction System *Python | Machine Learning | Streamlit*

Repository: Project-Link

- Built a machine learning model using XGBoost to predict customer churn.
- Analyzed 10K+ customer records to identify key churn factors.
- Performed data preprocessing and feature engineering to improve model performance.
- Developed a Streamlit app for real-time predictions and visualization.

Flight Data Analysis Dashboard *Power BI | Power Query*

Repository: Project-Link

- Built an interactive Power BI dashboard to analyze airline ticket pricing trends and flight data.
- Conducted EDA to identify key factors affecting ticket prices such as duration, timing, and routes.
- Created visualizations to support decision-making and highlight patterns in flight data.

Business Sales Overview Dashboard *Power BI | DAX*

Repository: Project-Link

- Developed an interactive Power BI dashboard providing a comprehensive overview of business sales performance.
- Performed data cleaning, transformation, and modeling using Power Query and DAX.
- Built dynamic visualizations (charts, KPIs, slicers) to track performance across regions, products, and time.

SSAS Sales Analysis Cubes *SQL Server | SSAS*

Repository: Project-Link

- Designed and deployed 3 OLAP cubes using SQL Server Analysis Services (SSAS).
- Built a star schema with FactSales and dimensions including Product, Customer, Time, Channel, and Salesman.

UK Bank Customers Segmentation Dashboard *Tableau*

Repository: Project-Link

- Developed an interactive Tableau dashboard to analyze UK bank customer data and identify key customer segments.
- Performed exploratory data analysis on customer attributes such as age, balance, gender, job classification, and regional distribution.
- Created dynamic visualizations (maps, charts, filters) to support data-driven decision-making and customer targeting.

PROFESSIONAL INTERNSHIP

Intensive Training Program (ITP) – Power BI Developer Jan 2026 – May 2026

Information Technology Institute (ITI), Menoufia Branch

- Completed an intensive, project-based program covering the full BI lifecycle: Software Foundations, Database & SQL, MSBI Stack, Power BI & Visualization, and Soft Skills.
- Mastered the Microsoft MSBI stack: SQL Server, SSIS (ETL), SSAS (Tabular & OLAP), and SSRS.
- Built advanced Power BI solutions using DAX, Power Query/M, data modeling (star schema), and Power BI Service deployment.
- Completed hands-on projects assessed by industry mentors through a project-based evaluation model.

TECHNICAL SKILLS

BI & Visualization: Power BI (DAX, Power Query/M, SSRS, Paginated Reports), Tableau

Data Modeling: Star Schema, Data Warehousing, Fact/Dimension Modeling, OLAP Cubes

Databases & SQL: SQL Server, T-SQL, NoSQL, Database Design, Stored Procedures

Data Engineering: ETL/ELT, SSIS, SSAS (Tabular/Multidimensional), Python (Pandas), Excel Advanced

Cloud & BI Platforms: Power BI Service, Microsoft Fabric, Azure

Automation & Integration: Power Automate, SharePoint Lists, Power BI REST API, HTTP Triggers, JSON Parsing, Conditional Logic, OneDrive for Business, Outlook

Development Tools: Git, GitHub, Streamlit

Core Competencies: Problem Solving, Data Structures & Algorithms, Analytical Thinking, Attention to Detail, Team Collaboration

EDUCATION

B.Sc. in Computer and Artificial Intelligence Sep 2021 – Jul 2025

Information Security & Digital Forensics, Faculty of Computers and AI, Banha University

LANGUAGES

Arabic: Native | English: Very Good

ADDITIONAL INFORMATION

Nationality: Egyptian | Military Status: Exempt
